

PLUM ISLAND TIDE TAP OBSERVATION DATA			
Name:	Date:	Location:	Tide: HIGH / LOW
Directions: Explore the tide pool - what do you see? Using the field guide, record tallies for each observation of the organisms you find.			

ORGANISM CATEGORY		SPECIES	TALLY	NOTES
Plants		Brown Algae		
		Red Algae		
		Green Algae		
Mollusca	Gastropoda	Periwinkle		
		Whelk		
		Moon Snail		
	Bivalvia	Mussels		
		Clams		
		Eastern Oyster		
Echinoderms		Sea Stars		
		Sea Urchin		
		Anemone		
Arthropods	Crustacea	Green Crab		
		Jonah Crab		
		Asian Shore Crab		
		Hermit Crab		
		Barnacles		
		Shrimp		
		Isopod		
		Amphipod		
	Others	Horseshoe Crab		
Chordates		Worms		
		Tunicates		
		Bryozoan		
		Atlantic Silverside		

PLUM ISLAND DR WMEASUREMENTS

Name:

Date:

Location:

Tide: HIGH / LOW

Directions: What is the quality of the water? Using Orion and other tools, measure different aspects of the water chemistry to better understand the water quality!

Measurement	Tool	Value	Units
Water temperature What is the water temperature?	Orion Probe		
Dissolved Oxygen How much oxygen is in the water?	Orion Probe		
pH Is the water acidic, basic, or neutral?	Test Strips		
	Orion Probe		
Salinity How salty is the water?	Refractometer		
	Orion Probe
